Solutions**

7-25-5

IN-FURROW | FOLIAR

PRODUCT DESCRIPTION

7-25-5 is a high orthophosphate fertilizer. It is designed to increase germination and ear or fruit size. The 80/20 ortho/poly phosphate blend provides the right amount of available phosphorus for the germinating crop at a time when soil conditions are cool and damp and soil phosphate is not readily available. It has a low salt index and is designed to be on the seed to provide immediately available phosphate to the newly germinated plant.

7-25-5 can also be used as a foliar treatment to provide instant energy during periods of high demand at key physiological growth stages.

Product Name	Analysis	Application Rate	Product Description	Use Description	Lbs/Gal	Organic
7-25-5	7-25-5	IF: 3-10 gal Foliar: 1-3 gal	High Orthophosphate starter and foliar fertilizer	On-seed starter and foliar phosphous supplement	11.30	NO
