Solutions**

SG Accelerate

SOIL

PRODUCT DESCRIPTION

SG Accelerate is the latest in biological residue management. It contains powerful cellulose and lignin degrading microbes and works fast to soften residue and speed decomposition of manure applications.

SG Accelerate converts your locked up fertilizer investment back into yield.

SG Accelerate 50/50 is a modified version containing an expanded set of microbial species that excel in both residue degradation and crop growth promotion. It is intended for broadcast applications where residue cycling and crop growth is needed simultaneously. SG Accelerate 50/50 is commonly used in turf grass applications and early row-crop broadcast applications.

Product Name	Analysis	Application Rate	Product Description	Use Description	Lbs/Gal	Organic
SG Accelerate	0-1-0.5	Broadcast: 1 qt	Residue Management & Degredation	Apply to exposed residue in the fall or early spring to weaken residue tissue and release nutrition	8.5	NO
