SG Engage RTU

SOIL

PRODUCT DESCRIPTION

SG Engage RTU is a lower-cost, high-grade, non-ionic soil penetrant. It helps reduce soil crusting, loosens hard clay, and improves aeration, optimizing the air and water content of the soil by reducing the surface tension of the water. This allows water and oxygen to better reach plant roots and evenly infiltrate into the soil profile.

SG Engage RTU is recommended for applications where repeated applications of a soil penetrant are desired at a reduced cost.
