Solutions**

SG Fulvic

IN-FURROW | FOLIAR | SOIL

PRODUCT DESCRIPTION

SG Fulvic is a concentrated form of fulvic acid that acts as a food source for the crop and the entire soil system. Adding SG Fulvic in-furrow or banded at planting will improve soil health and nutrient uptake for the growing crop. It leads to improved yield and crop vigor at germination, produces plant growth promoting compounds, and is a food source for plant and soil organisms.

SG Fulvic is approved for use in organic production.
