Solutions**

SG Hydr8-R

SOIL

PRODUCT DESCRIPTION

SG Hydr8-R is a revolutionary product designed to remediate high-sodium soils. With a blend of concentrated organic acids and plant-based surfactants, SG Hydr8-R moves sodium away from irrigation zones and down through the soil profile.

SG Hydr8-R applied at recommended rates results in reduced sodium in the root zone and a more balanced soil for the growing crop. It is soil or foliar applied.

Product Name	Analysis	Application Rate	Product Description	Use Description	Lbs/Gal	Organic
SG Hydr8-R	NA	Broadcast: 2-4 qt	Salt remediation with surfactant	Apply on soil to unlock calcium and move sodium down through the profile	9.30	NO
